Devices” 24.7.6.1.7

□ □ □  g. Profiles of all streets 24.5.4.8.3

□ □ □  h. No more than one lot created at the end of a stubout cross street 24.7.6.3.1

□ □ □  i. Lots

□ □ □  1. Lot size shall be sufficient to provide set back to conform to the Urban

Service District Zoning Code 24.7.1.1.2

□ □ □  2. Lot size shall be sufficient to provide space for residence and off-street

parking in single-family and multi-family residential areas consisting of

two (2) parking spaces per dwelling unit 24.7.1.1.3

□ □ □  3. Minimum residential lot size shall be 6000 sq. ft. if connected to a

sewerage disposal system (public or private) that is approved by the state

department of health and hospitals 24.7.1.1.4

□ □ □  4. All lots must front along a public roadway or a servitude of passage

24.7.1.1.4

□ □ □  5. All lots shall contain adequate footage and depth to enclose a 50’ square,

none of which may encroach upon a public road right-of-way or access

servitude to adjacent property 24.7.1.1.4

□ □ □  6. Minimum frontage width of a lot or servitude of passage is 25’ 24.7.1.1.4

□ □ □  7. Primary means of access is a publicly dedicated street, alley, or on a non-

publicly dedicated passageway for vehicular traffic 24.7.1.5

□ □ □  8. If subdivision involves new street construction: No primary access is an

arterial, major or collector street 24.7.1.5

9. Drainage

□ □ □  a. Flood hazard area 24.5.5.9.H

□ □ □  b. Existing contours at one (1) foot intervals or less shown on final drainage plan

24.5.4.8

□ □ □  c. All lots graded to drain to the street or to major drainage arteries as defined by

the SDDM 24.7.1.2.6

d. Rights-of-way

□ □ □  1. Definition 22-186

□ □ □  2. Construction in right-of-way without consent 22-189

□ □ □  3. Storm drainage pipe shall be located within street right-of-way, special

outfall or interconnection right-of-way may be required 24.7.1.2.6

□ □ □  4. Servitudes not adjacent to roadway:

□ □ □   a. 15’ on both sides of ditch that is less than 4’ in depth and less than

18’in width plus width of ditch 24.7.6.2.2.i

□ □ □   b. 15’ on one side and 20’on the other side of a ditch greater than or
IV. HYDROLOGY

A. Rainfall

□ □ □ Designed for 25-year, 24-hour duration as defined by TP40 (Exhibit 3)
□ □ □ Discharge limited to 10-year, 24-hour pre-development unless downstream improvements are made as to not cause adverse impacts (Exhibit 4)

B. Hydrologic Data: Preliminary Plan

□ □ □ Vicinity Map

Hydraulic Computations

□  □  □  Design criteria
□  □  □  Rounded to nearest 0.10 foot
□  □  □  Maximum stages at all nodes
□  □  □  Tailwater elevation
□  □  □  Graphic representation of surface and subsurface flow
□  □  □  Statement of no adverse impact
□  □  □  Maximum flows (pre vs. post)
□  □  □  Volume runoff (pre vs. post)
□  □  □  Hydrographs at discharge points (pre vs. post) (Exhibit 6)
□  □  □  Runoff factors
□  □  □  Time of concentration
□  □  □  Land slope
□  □  □  Onsite elevation determined by routing flows from downstream tailwater elevation

5. Typical roadway section

□  □  □  Roadway width
□  □  □  Roadway thickness
□  □  □  Shoulder width
□  □  □  Ditch dimensions
□  □  □  Ditch side slopes
□  □  □  Location of all utilities
□  □  □  Subsurface drainage location
□  □  □  Right-of-way width
□  □  □  Transverse road slopes

6. Lot drainage

□  □  □  Storm drain pipe located within street right-of-way
□  □  □  Special servitude for interconnection or outfall purposes within subdivision
□  □  □  All lots inside the Urban Services District and Urban Planning Area graded to drain to the street or to a Major Drainage Artery (Exhibit 1)
□  □  □  All lots inside Rural Subdivisions graded to drain to the street or to a Major Drainage Artery (Exhibit 1)
Outside the Urban Services District and Urban Planning Area the HTRPC can allow a portion to drain to the rear if:

- □ □ □ Drainage is to be perpetually privately maintained, or
- □ □ □ i. Drainage to the rear already exists or is to be dedicated; however, the percentage may not exceed 60% of the total depth of lots up to 225’ deep, or that portion greater than 135’ on lots greater than 225’ deep unless a greater percentage is required to comply with items ii or iii below.
  - □ □ □ ii. Where the size limitation of the roadside ditches will be exceeded
  - □ □ □ iii. Where the size of the curb and gutter drainage pipe exceeds 36” in diameter

7. Reference standard plan details of all drainage structures
8. Existing cross sections at maximum 100’ intervals showing:
   - Roadway
   - Ditch
   - Lot grades
9. Time of concentration
   - □ □ □ a. Rational method
   - □ □ □ b. SCS LAG method
10. South of the South Terrebonne Development Zone
    - □ □ □ Minimum roadway elevation +3.5’
    - □ □ □ Minimum lot elevation +2.0’

B. Closed Storm Drainage System
1. Minimum sizes
   - □ □ □ 15” minimum diameter
   - □ □ □ 8” minimum diameter for restrictor pipe
2. Minimum Service Life
   - □ □ □ Diameter less than 48” 50 year service life
   - □ □ □ Diameter greater than or equal to 48” 70 years
   - □ □ □ Side drain 30 years
3. Sized to operate full with a minimum self cleansing velocity
4. Slopes
   - □ □ □ Maximum slope 10 ft/sec
   - □ □ □ Outlet protection for velocity above 10 ft/sec
ENGINEERING APPROVAL SUBDIVISION CHECKLIST

Y  N  N/A  Urban Service District & Urban Planning Area

5. Manholes or catch basins
   □  □  □  Located at all changed in vertical and horizontal direction
   □  □  □  Maximum Spacing (LaDOTD Hydraulics Manual), but shall not exceed 250’

14. Private benefit = private ownership
   Methods, procedures and guarantees, including appropriate
documentation, that the facilities will be perpetually maintained so as
to function as designed and not result in nuisances or health hazards

15. Pond dimensions
   If depth is less than 3’ deep minimum width = 6’
   If depth is 3’ or deeper minimum width = 15’

16. Landscaped for aesthetic purposes and to stabilize banks
   Seeding and sodding
   No floatable or erodible material (bark mulch) in interior

17. Failure of owner to maintain will be cause for Parish to perform
    work and bill owner

18. Parish maintained pond control structures that do not abut a public
    right-of-way should be accessible by a 15’ minimum right-of-way
    to allow vehicle access

19. Control structures designed and constructed to operate
    automatically as much as possible

20. Designed with 1’ of freeboard above the elevation of the design
    flood (except parking lot ponds)

21. Pond design
    Dry - Sloped no flatter than 0.3% toward drainage outlet
    Wet – “low flow” channel installed with lining at minimum 0.3% slope

22. Wet pond bottom elevation 1.5 ft below normal low water
    elevation if constructed flat

23. “Flow through” pond has well defined low flow channel

24. Ponds greater than 4’ in depth have fence and locked gate

25. Design Volume
    Shown on plans
    Storage measured from the on-site 25 year stage elevation to a
    maximum depth of the pump drawdown elevation
    Wet and dry basins designed so that the portion of their bottom
    area, which is intended to be dry, shall have standing water no
    longer than 48 hours for all runoff events equal to or less than the
    25-year event
ENGINEERING APPROVAL SUBDIVISION CHECKLIST

Y  N  N/A  Urban Service District & Urban Planning Area

26. Hydraulic losses and structural integrity considered in closed systems on private property

27. Written restriction on final plat stating that no structure, fill or obstructions shall be located within any drainage easement or delineated flood plain

28. All publicly maintained facilities located in a recorded drainage servitude including any necessary for access

VII. EROSION AND SEDIMENT CONTROL

A. Design:

1. Required on all proposed developed sites of one acre or greater

2. Incorporated into excavation, construction and post-construction

3. Provisions for interception of all potential silt-laden runoff made before initial clearing and grading

4. Erosion control and storm water pollution plan provided

5. Erosion protection provided for all disturbed areas

B. Maintenance agreement provided before building permit is obtained

C. Best Management Practices:

1. Existing vegetation preserved where feasible and disturbed portions stabilized as soon as practicable

2. Structural practices to divert flows from exposed soil, store flows, or otherwise limit runoff and the discharge of pollutants from the site to the extent feasible

3. Prevention of the discharge of building materials into the Parish storm sewers or waters of the United States

4. Provide general good housekeeping measures to prevent and contain spills

5. Implementation of proper waste disposal and waste management techniques

6. Timely maintenance of vegetation, erosion and sediment control measures

VIII. SERVITUDE REQUIREMENTS AND DEDICATION

A. Ditches not adjacent to a roadway

1. Ditch less than or equal to 4’ deep or 18’ wide 15’ on both sides

2. Ditch greater than 4’ deep and/or 18’ wide 15’ on one side and 20’ on the other

3. Parallel ditches minimum 20’ crown between

Page 12 8/1/2008
ENGINEERING APPROVAL SUBDIVISION CHECKLIST

Y N N/A Urban Service District & Urban Planning Area

☐ ☐ ☐ 4. Ditch adjacent to roadway not greater than 3.5’ and 23’ wide
☐ ☐ ☐ 5. Minimum servitude for drain pipe
☐ ☐ ☐ Diameter less than 42” = 15’
☐ ☐ ☐ Diameter 42” and greater = 20’

☐ ☐ ☐ B. Letter Of No Objection required for work in parish right-of-way or parish property

☐ ☐ ☐ C. Developer’s responsibility to record any necessary servitude that are needed to connect a development site with an approved point of discharge

☐ ☐ ☐ f. City – Subsurface drainage requires, i.e. culverts and catch basins 24.7.1.1.1

☐ ☐ ☐ g. Minimum size and grade of culverts denoted and profiles of all ditches submitted 24.5.4.8.2.3

☐ ☐ ☐ - Proposed culverts fit within ditch

☐ ☐ ☐ h. Building of bulkheads on Bayou Black (permit) 6-6

10. Utilities

a. Water

☐ ☐ ☐ 1. Fire hydrants – spacing ≤ 500’ 24.7.6.1.8

☐ ☐ ☐ 2. Approval letter from Waterworks 24.5.4.6.7, 24.7.5.6

b. Gas

☐ ☐ ☐ 1. Gas mains 2” I.D. 3’ deep 24.7.5.4.1

☐ ☐ ☐ 2. Servitude for gas main provided 24.7.5.4.2

☐ ☐ ☐ 3. Approval letter from Gas Utility 24.5.4.6.7

c. Electricity

1. Light Standards 22-51

☐ ☐ ☐ a. Standards, “cobra head” or decorative type of appropriate height style and lamping 24.7.5.2

☐ ☐ ☐ b. Easements 24.7.5.2

☐ ☐ ☐ c. Location, spacing (spacing 300’ > x > 150’ and one at each intersection within street right of way) 24.7.5.2

☐ ☐ ☐ 3. Approval Letter from Electric Utility 24.5.4.6.7

d. Sewerage

☐ ☐ ☐ 1. Sewerage collection system provided 24.7.5.5

☐ ☐ ☐ 2. Approval letter from Department of Health and Hospitals 24.5.4.6.7

☐ ☐ ☐ 3. Approval letter from TPCG Pollution Control 24.5.4.6.7

☐ ☐ ☐ 4. Easements 24.7.5.1

MAJOR DRAINAGE ARTERIES

TERREBONNE PARISH, LOUISIANA

Bayou Black
Bayou Blue
Bayou Cane
Bayou Chauvin
Bayou Dularge
Bayou Grand Caillou
Bayou LaCache
Bayou Petit Caillou
Bayou Point Au Chien
CCC Ditch
Chacahoula Bayou
Company Canal
Donner Canal
Falgout Canal
Gulf Intracoastal Waterway
Hanson Canal
Little Bayou Black
Marmande Canal
Minors Canal
Ouiski Bayou
Ringo-Cocke Canal
Six Foot Ditch
St. Louis Bayou
St. Louis Canal
Terrebonne-Lafourche Drainage Canal
Also include any forced drainage pumping station feeder channel.
